**Date: 04/12/2020**

**Notice for Online Mid-Term Examination of T.Y.B.Sc IT Semester V**

This is to inform all student of T.Y.B.Sc IT Semester V that Online Mid-Term Examination will be conducted from **Sunday 06<sup>th</sup> December, 2020 onwards**

- All students are informed to prepare units 1 and 2 of the subjects for the mid-term examination and appear the exam through MS Team online platform
- Student should login TEN minutes prior to the exam by selecting respective batch meeting link E.g. student from **Batch A1** should join the meeting link **TYBScIT-Mid-Term-Batch-A1** from **TYBSc IT** channel]
- Exam attended in out of turn batch will be considered as **NULL result**
- **Google Chrome web browser** should be preferably used to login in exam.net for attending the exam online
- All Students should join the meeting **10 minutes prior** to the exam starting time and each one should switch on the video for effective exam supervision
- Exam link for exam.net will be shared by the supervisor through MSTems meeting. Students should enter **First-name, Last-Name, email(VSIT mail-id), class(eg - TYBScIT-A) and student-id(Complete RollNO)** details properly during the exam login. During the login in exam.net, VSIT mail-id must be used.
- Once exam begins, **Students login into exam.net exam will be closed after 10 minutes.**
- Ensure not to switch between other applications once exam begins. In case a student switch between applications while the exam is going on, exam will be blocked. To unlock the exam, mention the reason and wait for the supervisor to unlock. **Rights to unlock your exam fully resides with the supervisor.**
- Kindly see the mid-term examination timetable and batch-wise details attached herewith the notice.

Q1 Juhu police arrest 5 Nigerians on 06 March 2007.

20M

Mumbai: Juhu police arrested five Nigerian nationals for their alleged involvement in an inter-state job racket.

The arrested have been identified as Vinset Mezek (26), Ogobol Tony (25), Kovhni Okosav (35), Charles Niogo (21) and Odirom Babatude (26). One person named Terri, who is a wanted in the case, is at large, say police.

According to the police, the accused used to send mails to people about vacancies in hotels outside India. If anyone responded, they would ask him to deposit money in their bank accounts in Mumbai. However, once they received the money, they would never contact the person. Although the accused have admitted to have duped only one person of Rs 1.2 lakh, the police say that they may have cheated many more in Mumbai and in other cities.

The whole matter came to light after Prabhat Singh, a resident of Orrisa, lodged a complaint with the Juhu police. Singh had paid Rs 1.2 lakh to an unidentified person for a job in the UK. He was never contacted after that.

“During our course of investigation, we tracked the account numbers where the money was deposited. We also tracked down the e-mail ID and the mobile numbers from which the mails and messages were sent,” said PD Shinde, senior police inspector at Juhu police station.

From the above case write the following things.

Q1 Man arrested in a cyber-fraud case.

20M

TRIVANDRUM — 4 March 2007 : The city police arrested a 27-year-old man for allegedly cheating a Mumbai based software engineer through the Internet by posing as a woman and stealing money from his bank account.

Rajesh, a resident of Ambalamukku, runs an Internet cafe at Chenthitta. After befriending the engineer through chat, Rajesh posed as 'Renuka' and used a voice converter to disguise his voice, Sub-Inspector, Thampanoor police station Sheen Tharayil said.

He later forwarded a photo from a marriage bureau to the engineer, who provided a credit card and code to 'Renuka' to withdraw Rs2,500 for purchasing a flight ticket to Mumbai. The engineer even booked a room for 'Renuka' who failed to turn up. Enquiries revealed that Rs22,000 was withdrawn using the credit card.

From the above case write the following things.

- Q1 Hyderabad: The Cybercrime wing of the city police has registered a case against an unidentified person for allegedly creating fake UPI ids that resemble the Prime Minister's Citizen Assistance and Relief in Emergency Situations Fund (PM CARES Fund), police said on Saturday. 20M

According to KVM Prasad, Assistant Commissioner of Police Cyber Crimes a suo motu case was registered. Indian Computer Emergency Response Team (CERT) alerted the police that several fake Ids similar to PM CARES (pmcares@sbi) were in circulation and people should note the difference.

"We proactively booked the case and began the investigation," the police official told. The CERT, in its note informed that they identified some fake Ids such as pmcares@pnb, pmcares@hdfcbank, pmcare@yesbank, pmcare@ybl, pmcare@upi, pmcare@sbi, pmcares@icici were in circulation and cautioned public to verify the Id before they make a donation.

A case under relevant sections of the IT Act was registered, Prasad said.

Q1 Tamil Tiger Credit Card Scam Spreads To Chennai, India

20M

The Sri Ramachandra Medical College police at Porur, Chennai, arrested G. Elango, a Tamil Tiger agent carrying a British passport, on Friday and seized 28 ATM cards in his possession. The police said Elango illegally withdrew over Rs. 30 lakh from the ATM centres of a few nationalized banks and a private bank. The amount was then sent to the United Kingdom through unauthorized channels. It is learnt that the Chennai Police was alerted by a civilian who had seen Elango using several ATM cards to withdraw money from an ATM centre of a private bank on Mount-Poonamallee Road, Porur.

A police team led by the Assistant Commissioner Police Balasubramaniam caught Elango red-handed while he was withdrawing money from the ATM machine.

G. Elango (38) of Middlesex, United Kingdom, is a shareholder in 'Thamilini' — a cash and carry grocery shops operated by the Tamil Tigers in UK.

Elango is from Valvetiturai, a notorious port for smugglers in the north of Sri Lanka. He is the partner of the LTTE's cash and carry centres of Thamilini in London suburbs — one in Croydon and another in Southall.

After the arrest Police has found, besides the ATM cards, registration certificate books of two cars, a cellular phone and a passport. Tamil Nadu Police is now seeking the assistance of the Scotland Yard to obtain more information about Elango. The Tamil Ttigers are also under investigation in UK for operating credit card rackets in Europe.

The case information was coming from a civilian that noticed a cautious act of a smuggler. Even as we, individual can give alarm to prevent the unethical behaviour of the person doing doubtful acts.

From the above case write the following things.

Q1 A man from Nigeria and a woman from Mumbai were arrested by the Kollam Crime Branch CID from Mumbai on charges of an Internet fraud. The duo is reported to have offered a business deal in a new oil preparation with aphrodisiac properties. 20M

The identity of the arrested Nigerian was given as Frank Ogbonnaya and that of the woman as Jyotsna Ahluwalia. The fraud, with similarities of a typical Nigerian letter scam, was a fraudulent e-mail that hit inboxes.

The message called for financial partnership in exporting the oil to Nigeria and promised that it would fetch a profit of more than \$25,000 a gallon. A businessman from Thiruvananthapuram, Anil Kumar, fell prey to the offer and responded.

Crime Branch sleuths feel that more Nigerians and Indians are involved in the fraud. Frank is one of the kingpins. The woman was closely associated with the gang and that she and Frank had often talked to Anil Kumar on mobile phones. Once the deal was fixed, Anil was asked to deposit his share in ten different bank accounts in Mumbai, which he did.

According to his complaint, he had deposited about Rs.1.5 crore in these accounts. He was informed that the accounts are operated by persons who would be supplying the raw material to prepare the oil. But once the deposits were made,

there was no contact from the Mumbai side. Anil then lodged a complaint with State Police Chief K.S. Balasubramanian.

The complaint was then directed to Additional Director General of Police, Crime Branch, Vinson M. Paul, who in turn handed it over to the Kollam Crime Branch for investigations. Crime Branch officials based their probe on the mobile phone towers from where Frank and Jyothsana had called Anil.

They went to Mumbai along with Anil and soon tracked down Frank and nabbed him with the help of the local police. It was based on his confessions that Jyothsana was arrested. The police said the bank accounts with bogus addresses were opened by her. The police suspect that the gang could have cheated more persons.

From the above case write the following things.

Q1 Paradigm Geophysical Pty Ltd. vs Commissioner Of Income Tax ... on 13 March, 2020 20M

Signature Not Verified Digitally Signed Signing Date:13.03.2020 15:56:04. Petitioner- assessee is a company incorporated under the laws of Australia and is a tax-resident of that country. It is engaged in the business of developing and providing customized software enabled solutions and annual maintenance services. The solutions provided by the Petitioner are used by the oil and gas industry in relation to excavation, extraction, production activities and seismic analysis.

Petitioner opted to be taxed on presumptive basis under section 44BB(1) of the Act, whereby 10% of the aggregate of receipts is deemed to be profits and gains of business and is subjected to tax. The assessee filed its return of for the assessment year 2012-2013, declaring a total income of Rs. 19,71,61,430/- arising inter alia, from the business of providing services or facilities in connection with extraction or production of mineral oils. The case was picked up for scrutiny and notice under Section 143(2)/142(1) was issued by the Assessing Officer (hereinafter, „AO“). Eventually, the AO held that in accordance with terms of the contract, the nature of services provided by the Petitioner fell within the purview of Royalty/ Fees for Technical Services (hereinafter, referred to as „FTS“) and is liable to be taxed under section 44DA instead of section 44BB, and proposed to compute the total income of Petitioner at Rs. 4,92,90,360/- as against total income of Rs. 1,97,16,140, offered to tax by the Petitioner. On 05.03.2015, a draft assessment order was issued by the AO under Section 143(3)/144C (1) of the Act proposing to tax the revenues received by the Petitioner under section 44DA of the Act, estimating 25% of gross receipts as "business Signature Not Verified Digitally Signed Signing Date:13.03.2020 15:56:04 income" taxable under section 28 to 43C of the Act. Thereafter, the final assessment order was passed on 11.05.2015, under Section 44C(3)(b)/143(3), confirming the addition/adjustment proposed in the Draft Assessment Order.

From the above case write the following things.

Q1 Vijay Kumar vs The State Of Madhya Pradesh Thr on 1 May, 2017. As per the prosecution case, complainant Rahul Agrawal made a written complaint alleging therein that some person has hacked his google account by U-Tube Channel link. It is also alleged that after getting password from the google account the applicant has transferred the money from the bank account of complainant in his own account. On receiving the complaint, an enquiry was conducted by the police and after completion of enquiry Cyber Police, Zonal Office, Gwalior has registered a case against the applicant for the offences under Section 420 of IPC and Section 66(c) of the Information and Technology Act. 20M

Learned counsel for the applicant submits that the applicant is an innocent person and he has been falsely implicated in the matter. There is no documentary evidence available on record to show that the present applicant has hacked the password from the google account of the complainant and transferred the money from the bank account of complainant in his own account. The applicant is aged about 19 years and is a student. He is in custody since 22.3.2017. He is not further required for interrogation. He has no previous criminal past and settlement has been arrived at between complainant and applicant. Now on the basis of said settlement an application under Section 482 of CrPC has been filed for quashing the FIR and for compounding the offences. In these circumstances, learned counsel prays for grant of bail to the applicant.

It is directed that the applicant namely Vijay Kumar be released on bail on his furnishing a personal bond in the sum of Rs.1,00,000/- (Rupees One Lac only) with two solvent sureties of Rs.50000/- each to the satisfaction of the trial Court for his

regular appearance before the trial Court on the condition that he shall remain present before the Court concerned during the trial and shall also comply with the conditions enumerated under Section 437(3) of Cr.P.C. and so also as imposed by the trial Court.

This order shall be effective till the end of trial but in case of bail jump, it shall become ineffective.

From the above case write the following things.

Q1 BPO Fraud

20M

In another incident involving Mphasis, India, four call centre employees gained the PIN codes, from four of the Mphasis's client, Citi Group, in spite of not being authorized to do so. Various accounts were opened in Indian banks, under false names and within two months, they managed to transfer money to these accounts from Citigroup customers accounts using their PINs and other personal information.

This cyber fraud case occurred in December 2004, but it wasn't until April 2005 that the Indian police were able to identify the individuals to make an arrest. It was made possible with a tip provided by a U.S. bank when the accused tried to withdraw cash

from these fake accounts. From the \$426,000 that was stolen, only \$230,000 were recovered.

The accused were charged under Section 43(a), unauthorized access involved to carry transactions.

From the above case write the following things.

Q1 BSNL, Unauthorized Access

20M

In a leading cybercrime case, the Joint Academic Network (JANET) was hacked by the accused, after which he denied access to the authorized users by changing passwords along with deleting and adding files. Making it look like he was authorized personnel, he made changes in the BSNL computer database in their internet users' accounts.

When the CBI carried out investigations after registering a cybercrime case against the accused, they found that the broadband Internet was being used without any authorization. The accused used to hack into the server from various cities like Chennai and Bangalore, amongst others. This investigation was carried after the Press Information Bureau, Chennai, filed a complaint.

In the verdict by the Additional Chief Metropolitan Magistrate, Egmore, Chennai, the accused from Bangalore would be sent to prison for a year and will have to pay a fine of Rs 5,000 under Section 420 IPC and Section 66 of the IT Act.

From the above case write the following things.

Q1 Cyber Attack on Cosmos Bank

20M

In August 2018, the Pune branch of Cosmos bank was drained of Rs 94 crores, in an extremely bold cyber-attack. By hacking into the main server, the thieves were able to transfer the money to a bank in Hong Kong. Along with this, the hackers made their way into the ATM server, to gain details of various VISA and Rupay debit cards.

The switching system i.e. the link between the centralized system and the payment gateway was attacked, meaning neither the bank nor the account holders caught wind of the money being transferred.

According to the cybercrime case study internationally, a total of 14,000 transactions were carried out, spanning across 28 countries using 450 cards. Nationally, 2,800 transactions using 400 cards were carried out.

This was one of its kinds, and in fact, the first malware attack that stopped all communication between the bank and the payment gateway.

From the above case write the following things.

- a. Case is Cognizable /Non-Cognizable?
- b. Section Applied
- c. Explain each Section
- d. Fine payable/Imprisonment Up to years
- e. Explain in short the entire case

1. If you are appointed as a manager of FMCG(**Fast-moving consumer goods**) company how do you calculate the carbon foot print( Consider the factors such as Transportation, Purchasing of equipment's) of your company and what are the changes you bring in your work habit? 20
2. What are the various e waste generated in your house hold? If you are appointed as a secretary of Sharma Housing society how to you handle the mechanism of E-waste generated by your society? 20
3. Assume If you are working as a teacher in St Mary academy how do you help your organisation to go paperless (Consider the factors such as Assignment Collection technique, Online test) and any another assessment which uses paper? 20
4. Assume if you are appointed as a CGO(Chief Green Officer) of Bharat LTD, What would be your action plan toward greening your organisation(Consider the factors such as responsibilities and duties of CGO) ? Also estimate the cost required implementing it? 20
5. Assume if you are a purchase manager in a company, what are the different issues that should be considered to know your supplier while purchasing any electronic equipment? 20
6. If you are working as a manager in Corporate Office Explain how telecommuting and EDI process can be implemented during this lock down ? 20
7. If you are developing a gaming application for ABC company. Explain the implementation of SMART goals with respect to your projectwork? 20
8. You being a store manager at MyPhone mobile store, How do you implement recycling and refurbishing process in your store? 20
9. As a network engineer if you have to set up an intranet for your organisation what are the factors you take in to consideration as per the need of the organisation? 20
10. Looking at the power consumed during lock down, you have decided to monitor the power consumption of your house and minimise its use wherever possible. What devices will you use to monitor power consumption and suggest the various measures? 20

Green computing Internal exam question paper:

1. If you are appointed as a manager of FMCG (**Fast-moving consumer goods**) company how do you calculate the carbon foot print (Consider the factors such as Transportation, purchasing of equipment's) of your company and what are the changes you bring in your work habit? 20
  - Calculate the carbon footprint generated through Transportation – 5 Marks
  - Calculate the carbon footprint generated through purchasing new equipment – 5 Marks
  - Changes suggested in order to minimize the carbon footprint – 10 Marks
2. What are the various e-waste generated in your house hold? If you are appointed as a secretary of Sharma Housing society how to you handle the mechanism of E-waste generated by your society? 20
  - Mention & analyse the e-waste generated in your house – 10 Marks
  - Propose a mechanism from a Secretary's point of view – 10 marks
3. Assume If you are working as a teacher in St Mary academy how do you help your organisation to go paperless (Consider the factors such as Assignment Collection technique, Online test) and any another assessment which uses paper? 20
  - Describe the challenges faced by the Teacher if organization decides to go Paperless only considering factors given – 10 marks
  - Suggest solutions the challenges mentioned above – 10 Marks
4. Assume if you are appointed as a CGO (Chief Green Officer) of Bharat LTD, What would be your action plan toward greening your organisation (Consider the factors such as responsibilities and duties of CGO)? Also estimate the cost required implementing it? 20
  - Explain the action plan considering yourself as a CGO of a company – 10 Marks
  - Calculate & estimate the cost required in actual implementation of above suggestions – 10 Marks
5. Assume if you are a purchase manager in a company, what are the different issues that should be considered to know your supplier while purchasing any electronic equipment? 20
  - Responsibility of a Purchase manager towards greening organisation – 10 marks
  - Consider the issues while selecting a supplier for a company – 10 Marks
6. If you are working as a manager in Corporate Office, explain how telecommuting and EDI process can be implemented during this lock down? 20
  - As a Manager, how will you implement Telecommuting option for employees – 10 marks

- 7 If you are developing a gaming application for ABC company. Explain the implementation of SMART goals with respect to your project work? 20

  - As a Manager, how will you make use of EDI technology for smooth conduct of the work – 10 Marks
  - What are SMART goals – 10 Marks
  - How will you implement them as a Developer of a gaming application – 10 Marks
- 8 You being a store manager at MyPhone mobile store, How do you implement recycling and refurbishing process in your store to stand out in the race? 20

  - What is recycling & refurbishing -10 marks
  - How will you implement with respect a mobile store – 10 Marks
- 9 As a network engineer if you have to set up an intranet for your organisation what are the factors you take in to consideration as per the need of the Government organisation? 20

  - Factors that needs to be considered while setting up an intranet – 10 Marks
  - How will you set up an intranet in an Govt. organization – 10 Marks
- 10 Looking at the power consumed during lock down, you have decided to monitor the power consumption of your house and minimise its use wherever possible. What devices will you use to monitor power consumption and suggest the various measures? 20

  - List and analyse the power consumption in your house using different devices-10 marks
  - What measures will you take in order to minimize the power consumption – 10 Marks

**VIDYALANKAR SCHOOL OF INFORMATION TECHNOLOGY**

**Repeat Midterm Examination \_\_\_\_\_ 2020**

Course: **T.Y.B.Sc.(I.T.) Sem: VI**

Subject: **IT Service Management**

Date:

Time:

Total Marks: 20 Marks

**Set – 1**

Marks Obtained:

- Q. 1 Explain how business and IT alignment help achieve business objectives. 10 M
- Q. 2 Roopam has started Bahara Fashion Store and needs you to provide ITIL services. The objective of his business to make good amount of profit while maintaining the quality and reputation. 10 M

Illustrate the various IT processes that you will provide to meet the business objective. Also mention how will you align business and IT services for Roopam.

Vidyalankar School of Information Technology

TYBScIT Semester VI

Subject: Principles of Geographic Information Systems

Faculty Members: Pushpa M, Spruha M, Ujwala S

Each question carries 20 Marks each

Q1. Two polygons intersect when their minimal bounding boxes overlap. Provide an example for the same. Provide a counter-example of the inverted statement, which show that even if the minimal bounding boxes overlap, the two polygons may still not intersect or meet or have one contained in other. [5 marks] Also write equations for meets, intersects, overlaps, contains and disjoints. [10 marks]

**Rubrics for grading:**

Providing an example of Two polygons intersect when their minimal bounding boxes overlap [05 Marks]

Providing Counter Example which show that even if the minimal bounding boxes overlap, the two polygons may still not intersect or meet or have one contained in other. [05 Marks]

Writing equations for meets, intersects, overlaps, contains and disjoints. [10 marks]

Q2.The original raster, Classification table of equal interval and equal frequency is given.

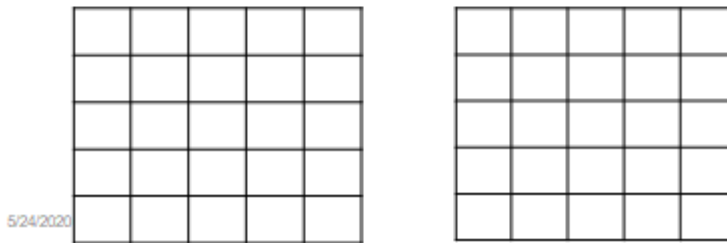

**Question**

Original Value	New Value	#cells	Original Value	New Value	#cells
1,2	10	9	1	10	5
3,4	20	8	2,3	20	6
5,6	30	4	4	30	6
7,8	40	1	5,6	40	4
9,10	50	3	8,9,10	50	4

2	1	1	2	6
4	4	5	4	9
4	3	3	2	10
4	5	6	8	10
4	2	1	1	1

Original raster is given

Using the classification table of equal interval and equal frequency, create the new rasters.

5/24/2020

Rework the same example and show what the results would be for three classes, both with equal interval classification and equal frequency classification. Also create new rasters for the same.

**Rubrics for grading:**

Creating new raster [05 marks]

Rework the same example and show what the results would be for three classes, both with equal interval classification and equal frequency classification. Also create new rasters for the same. [15 marks]

Q3. Prepare a list of ten different professions that use the applications of Principles of Geographic Information Systems and describe the possible relevant problems or challenges in their "Geographic Space". [Each profession problems and challenges – 02 Marks]

**Rubrics for grading:**

[Each profession problems and challenges – 02 Marks]

Q4 What is the role of hardware and software in terms of GIS. How will the development in related fields such as hardware, communication and multimedia will influence the future of GIS? What is the shortcoming?

**Rubrics**

Definition of hardware and software role in GIS [05 marks]

Development explanation [05 marks]

Influencement in GIS [05 marks]

Shortcomings [05 marks]

Q5 How DBMS can be linked with GIS. What are some common challenges and their solutions when designing or implementing a geodatabase? State by giving any live example.

**Rubrics**

Definition of dbms [05 marks]

Challenges [05 marks]

Solutions [05 marks]

Example [05 marks]

Q6 Draw a map of where you live. [05 marks] Discuss the similarities, differences, styles, and techniques on your map and compare them with two others. [05 marks] What are the commonalities between the maps? [05 marks]. What are the differences? What accounts for such similarities and differences? [05 marks]

Q7 How to Create Standard Maps. What is the objective of map creations? Explain why it is important to define [05 marks]

a. Define a Projection [05 marks]

b. Giving Perspective with an Inset Map [05 marks]

c. Filling the Surrounding Map Data [05 marks]

**Q8 (5 marks each)**

- 1) Consider the determined values for the coefficients in the respective formulae, as given in the figure. Make a study of edge effects, for the locations (-2, 10) and (12,10).

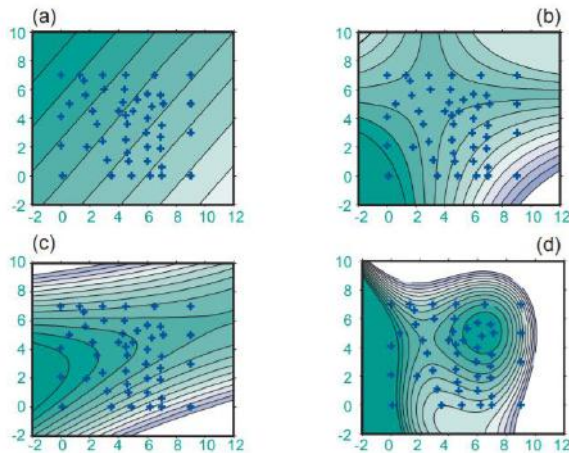

Fig1: Various global trend surfaces obtained from regression techniques. Values range from white (low) and dark green (high)

- 2) How could one force a GPS receiver to operate in 2D positioning mode? How would one set up an experiment to determine positioning accuracy in this mode and the relation to the actual height of the receiver?
- 3) Data clean-up operations are often executed in a particular order. Why is this? Give sensible ordering of a number of clean-up operations.
- 4) Consider the actual and estimated location values for Root Mean Square Error. Calculate the RMSE with the help of the formula and explain the result.

---

**Rubrics**

1. Write the formulae for the Trend surface and explain the edge effects for the given locations.

5) (5 marks)

2. Explain the coordinate system with the help of 2D positioning mode with the help of an example, which determines positioning accuracy and relation to actual height and mode of the receiver.

6) (5 marks)

3. Explain the importance of data clean-up and its operations. State the order of executions.

7) (5 marks)

4. Write the RMSE formula. Consider any actual and estimated values for the location and calculate RMSE and justify the calculated result. (5 marks)

**Q9 (5 marks each)**

- 1) Estimate a realistic distance between a GPS satellite that is in view and the receiver that you are holding, clarifying your assumptions. Indicate the minimum and maximum values. Finally, compute the time delay a satellite message incurs before being received, again clarifying the assumptions made.
  - 2) You wish to reconcile spatial data from two neighboring countries to resolve a border dispute. Published maps in the two countries are based on different local horizontal datums and map projections. Which steps should you take to render the data sets spatially compatible?
  - 3) Rasterization of vector data is sometimes required in data preparation. What reasons may exist for this? Explain the raster resolution must be carefully selected. Explain why it is so.
  - 4) What are the fundamental issues with multiple data sources? How do you combine these data? Explain.
- 

**Rubrics**

1. Draw the GPS satellite diagram to show the distance between the GPS satellite. Calculate the time delay a satellite message and give clarification.

(5 marks)

2. Consider the spatial data of two countries to resolve the boundary issues of these countries with the help of horizontal datums. Brief the importance of datum and map projections. State the critical step, which is spatially compatible.

(5 marks)

3. State the definition of rasterization. Explain the data preparation with reason.

(5 marks)

4. Write the four cases considered for combining data from multiple sources. Brief the processes used form combination.

(5 marks)

---

---

**Q10 (5 marks each)**

- 1) Suppose you wish to use spatial data from two neighboring countries to resolve countries like Nepal and India to solve a border dispute. Published maps in these two countries are based on horizontal datums and map projections. How do you find the way by using data sets spatially compatible?
- 2) You are required to match GPS data with some map data. The GPS data and the map layer are based on the different horizontal datum. Which steps should you take to make the GPS data spatially compatible with the map data?
- 3) Suppose you wish to produce a small scale thematic map of India. The map should show the population densities for the different regions. What would be an excellent map projection for the representation of the population densities of your country? Consider the class of the projection: the projection property and the lines of intersection or point or line of tangency. The technique of moving window averaging using an averaging function that applies inverse distance weighting. What value will be computed for the cell if the averaging function is inverse squared distance weighting?

---

---

**Rubrics**

1. Students should consider spatial data of two countries to resolve the boundary issues of these countries with the help of horizontal datums. Explain datum and map projections. State the critical step, which is spatially compatible.  
(5 marks)
2. Explain GPS and map with the help of datum. Consider the map data and elaborate on the steps used to show the compatibility of these maps.  
(5 marks)
3. State the types of maps. Draw the map for India, which shows the population density of India. Explain the types of projection properties.

(5 marks)

4. Explain inverse distance weighting with the help of averaging function calculations.

(5 marks)

---

---

**Questions Set 3**

**Marks:20**

**Attempt the following questions (5 marks each)**

- 4) Suppose you wish to use spatial data from two neighboring countries to resolve countries like Nepal and India to solve a border dispute. Published maps in these two countries are based on horizontal datums and map projections. How do you find the way by using data sets spatially compatible?
  - 5) You are required to match GPS data with some map data. The GPS data and the map layer are based on the different horizontal datum. Which steps should you take to make the GPS data spatially compatible with the map data?
  - 6) Suppose you wish to produce a small scale thematic map of India. The map should show the population densities for the different regions. What would be an excellent map projection for the representation of the population densities of your country? Consider the class of the projection: the projection property and the lines of intersection or point or line of tangency.
  - 7) The technique of moving window averaging using an averaging function that applies inverse distance weighting. What value will be computed for the cell if the averaging function is inverse squared distance weighting?
- 
-

**Security in Computing**

**Repeat Midterm Questions May 2020**

Q.no	Question Description	Marks
1		
A	What is the principle of equivalent security?	2
B	Why should any organisation identify the weak links in its security infrastructure?	5
C	Explain the relation between the principle of equivalent(transitive) security and the weakest link, with the help of a real life example	10
D	State the different strategies used to keep an attacker away from the weak links.	3
2		
A	State the importance of identifying threat vectors.	3
B	Which type of threat vectors are considered more hazardous?	2
C	Explain in detail any three insider threat vectors.	15
3		
A	Define Risk	2
B	Why is Risk analysis important to any security effort?	3
C	How is the quantitative approach different from the qualitative approach?	10
D	What is the problem with the ALE approach?	5
4	Explain in detail the transition in encryption techniques; starting with the earliest methods implemented till the modern PKI.	20
5	Highlight the importance of having zones of trust applied in the context of storage networks? Which are the different ways in which this is applied for storage networks?	20
6		
A	How packet filter and application gateway can be used to act as a barrier between inside and outside network? Explain with respect to real life industry application.	10
B	What are the ways of implementing spread spectrum communication in wireless networks? Explain in detail.	10
7	"VoIP technologies use various protocols that enable the transit and real-time conversations". With reference to this quote explain how the following protocol helps in VoIP? <ul style="list-style-type: none"> <li>a. Protocol: MGCP - Governing Standard, Purpose, Architecture, Function, Vulnerabilities</li> <li>b. Protocol: IAX and IAX2</li> <li>c. Protocol: SS7</li> <li>d. Protocol: H.248 (Megaco)</li> </ul>	20
8	What is meant by virtual machines (VMs). Describe the VMs life cycle. How virtual machine is different from cloud computing.	20
9		
A	What is SQL injection? What is the significance of SQL injection as an attack methodology?	10
B	Write about any five SQL server stored procedures abused by an attacker and find the remedy for each.	10
10		
A	What is meant by Demilitarized Zone (DMZ)? Briefly describe the architecture of DMZ. Write its significance in security.	10
B	How intranets and extranets plays an important role for users in providing security at internal and external environment?	10

Name of Cluster:

Repeat Mid term Time table:

Criteria II – Teaching-Learning and Evaluation

Date: 29 May 2020

**Notice regarding Repeat Midterm Examination for students of Sem II, IV, VI**

This is to inform all students, that Repeat Midterm Examination for Sem II, IV and VI will be conducted only for those students who were absent for the Regular Midterm Examination. The examination will be in the form of an Open Book Written Exam and not Online MCQ.

The examination will be conducted as per the following schedule:

	FYBScIT Sem II	SYBScIT Sem IV	TYBScIT Sem VI
<b>Mon 08 Jun 2020</b>	Object Oriented Programming	Core Java	Software Quality Assurance
<b>Tue 09 Jun 2020</b>	Microprocessor Architecture	Introduction to Embedded Systems	Security in Computing
<b>Wed 10 Jun 2020</b>	Web Programming	Computer Oriented Statistical Techniques	Business Intelligence
<b>Thurs 11 Jun 2020</b>	Numerical and Statistical Methods	Software Engineering	Principles of Geographic Information Systems
<b>Fri 12 Jun 2020</b>	Green Computing	Computer Graphics and Animation	IT Service Management Cyber Laws

**Instructions for Students:**

- Examination paper will be mailed by the subject teacher to the concerned student on his/her vsit email account only by 9.00 a.m.
- Concerned student should check if he/she is able to login into his/her vsit email account. In case the student is unable to login, student should send an email to year Incharge, from his/her other email account (such as Gmail). **Mention your roll no, name and vsit email id in the mail.**
  - FY Incharge Sanjeela Sagar [sanjeela.sagar@vsit.edu.in](mailto:sanjeela.sagar@vsit.edu.in)
  - SY Incharge Shajil Kumar [shajil.kumar@vsit.edu.in](mailto:shajil.kumar@vsit.edu.in)
  - TY Incharge Prachi Mahajan [prachi.mahajan@vsit.edu.in](mailto:prachi.mahajan@vsit.edu.in)
- Alongwith the examination paper, student will receive a link for submission of answer. Answers must be submitted on the same day by 4.00 p.m
- Students should carefully read the instructions given on the link before submitting the answers. Answers will not be accepted via email.

Date: 29 May 2020

**Notice to Teachers regarding Repeat Midterm Examination of Sem II, IV, VI**

This is to inform all teachers, that Repeat Midterm Examination for Sem II, IV and VI will be conducted only for those students who were absent for the Regular Midterm Examination.

The examination will be conducted as per the following schedule:

	FYBScIT Sem II	Teacher InCharge	SYBScIT Sem IV	Teacher InCharge	TYBScIT Sem VI	Teacher InCharge	Deadline for Evaluation of Answers
Mon 08 Jun 2020	Object Oriented Programming	Dr. Amits J	Core Java	Seema B	Software Quality Assurance	Seema V	Wed 10 Jun 2020
Tue 09 Jun 2020	Microprocessor Architecture	Laxmikant M	Introduction to Embedded Systems	Sabir S	Security in Computing	Geeta S	Thurs 11 Jun 2020
Wed 10 Jun 2020	Web Programming	Ketaki G	Computer Oriented Statistical Techniques	Maitreyi K	Business Intelligence	Hrishikesh T	Fri 12 Jun 2020
Thurs 11 Jun 2020	Numerical and Statistical Methods	Aasha C	Software Engineering	Mithila C	Principles of Geographic Information Systems	Spruha M	Sat 13 Jun 2020
Fri 12 Jun 2020	Green Computing	Akshata J	Computer Graphics and Animation	Rohini D	IT Service Management Cyber Laws	Bhavesh S Payal S	Mon 15 Jun 2020

**Instructions for Subject Teacher InCharge:**

- Subject Teacher Incharge will send individual, separate mails to all the students appearing for the Repeat Midterm Exam in the subject.
- Mail should be sent to the concerned student on his/her vsit email account only by 9.00 a.m.
- Mail should contain the following:
  - One question of the concerned subject
  - Link for submission of answer. This link should be shared with the concerned year Incharge.
- Subject Teacher Incharges should not accept answers via email.
- Subject Teacher Incharges should evaluate the answers by the deadline mentioned in the table above.
- Subject Teacher Incharges should maintain a record of submissions by the students.
- Subject Teacher Incharges should evaluate all the received submissions and update the concerned Excel sheet of Internal marks.

**IoT Mini project Topics**

<p><b>Password based Control Circuit</b></p>	<p>Create a circuit using LCD, keypad and electric bulb. On entering the correct password the electric bulb should turn on and LCD should display "Correct password". On entering the wrong password, message should be displayed on LCD "wrong password entered".</p>
<p><b>Home Automation - I</b></p>	<p>Create a circuit using LCD, electric bulb, PIR sensor, temperature sensor and fan. When PIR detects close range motion, electric bulb should turn on and LCD should display an appropriate message. When temperature sensor shows high temperature, fan should start and LCD should display an appropriate message.</p>
<p><b>Digital Clock</b></p>	<p>Create a circuit using LCD Screen. The LCD screen should display time in digital format.</p>
<p><b>Smart Irrigation System</b></p>	<p>Create a circuit using temperature sensor, RGB LED, LCD Screen and DC Motor. DC Motor is used for starting Water Pump. When temperature is below 25, RGB LED should show green light; when temperature is between 25-40, RGB LED should show blue light and when temperature is above 40, RGB LED should show red light. The Water Pump should only start when temperature is above 25. Temperature values should show on the LCD Screen and also mention whether Water Pump is ON or OFF.</p>
<p><b>Automatic Car Parking Lot</b></p>	<p>Create a circuit using LCD Screen, ultrasonic sensor and servo. When car is detected by sensor, appropriate message should be shown on LCD Screen and servo should open the parking gate to allow the car to park.</p>
<p><b>Home Automation - II</b></p>	<p>Create a circuit using LDR, electric bulb, PIR sensor, temperature sensor and fan. Electric bulb should turn on depending on the darkness or brightness based on the LDR and fan should start when temperature sensor shows high temperature. The entire circuit should work only when someone is present in front of the PIR sensor otherwise all circuits should be turned off.</p>
<p><b>Water Level Controlling System</b></p>	<p>Create a circuit that controls the water pump. If water is below a certain level, the water pump starts automatically and when water rises above a certain level, the water stops automatically. Use the necessary components for creating the system.</p>

Car Parking Lot	Create a circuit using LCD Screen, pushbuttons and servo. The parking lot can park only 10 cars. When entry button is pushed, servo should open the parking gate to allow the car to park reducing the parking space count. When exit button is pushed, servo should allow the car to exit the parking lot, thus increasing the parking space count. Appropriate messages should be shown on LCD Screen regarding the parking space count.
Traffic Light Controller System	Create a circuit using multiple colour LED's or RGB LED's. You need to simulate a formation of 4 signals similar to real life scenario at a cross roads. When one signal is green the others must be red. Each signal will be green for some duration, then orange and red.
Home Automation - III	Create a circuit using LCD Screen, IR remote, electric bulb and fan. The IR remote should control the bulb and fan. Switching on and off the electric bulb and fan should be controlled through the remote. Appropriate message should be displayed on the LCD Screen.
Particles Detector for Air Quality	Create a circuit using Gas Sensor, RGB NeoPixel Ring, piezo buzzer. The idea is to check the presence of gases in the atmosphere. When lesser particles is present, the NeoPixel Ring will indicate it with green colour. As the level of particle rises, the NeoPixel Ring will indicate it with orange/yellow colour. If the particles are above the danger level, the NeoPixel Ring will show it with red colour. [Hint: Take NeoPixel Ring with 12 LED's, use 4 LED's for green colour, 4 LED's for orange/yellow colour and 4 LED's for red colour]
Patient Temperature Monitoring System	Create a circuit using RGB LED, temperature sensor and ESP8266. The RGB LED will glow based on the temperature values. If the temperature value is too high, then RGB LED shows red else it shows green. The temperature values should be sent on Thingspeak channel through ESP8266.
Smart Dustbin	Create a circuit using 2 ultrasonic sensors, servo, piezo buzzer and ESP8266. The lid automatically opens when it detects people coming close to throw trash and closes after certain time. The second ultrasonic sensor detects the level of trash which is pre-defined. This value is sent on Thingspeak through ESP8266. If the bin is full, buzzer sounds an alarm.
Smart Hand Sanitizer	Create a circuit using ultrasonic sensor, PIR sensor, servo, piezo buzzer and ESP8266. The PIR Sensor detects person's hand coming close to sanitizer and opens the servo for sanitizer to eject and closes after certain time. The ultrasonic sensor detects the level of sanitizer which is pre-defined. This value is sent on Thingspeak through ESP8266. If the bottle is empty, buzzer sounds an alarm.
Smart Walking Stick for the Blind	Create a circuit using ultrasonic sensor, piezo buzzer and DC motor or vibration motor. The ultrasonic sensor detects any obstacle or object in front of the person. Depending on the distance, the alarm is started and the vibration motor vibrates the stick.
Smart Car Parking System	Create a circuit using LCD screen, red and green LED's and 5 ultrasonic sensors. These 5 sensors serve as a parking lot indicator i.e. maximum 5 cars can be parked. Show freely available slots on the LCD screen. When car is parked, indicate that the slot is occupied using RED LED and show the free slots on LCD screen. If all slots are full, show the appropriate message. Green LED indicates that the parking lot is empty and free.

Password based Control Circuit	Create a circuit using LCD, keypad and electric bulb. On entering the correct password the electric bulb should turn on and LCD should display "Correct password". On entering the wrong password, message should be displayed on LCD "wrong password entered".
Home Automation - I	Create a circuit using LCD, electric bulb, PIR sensor, temperature sensor and fan. When PIR detects close range motion, electric bulb should turn on and LCD should display an appropriate message. When temperature sensor shows high temperature, fan should start and LCD should display an appropriate message.
Digital Clock	Create a circuit using LCD Screen. The LCD screen should display time in digital format.
Smart Irrigation System	Create a circuit using temperature sensor, RGB LED, LCD Screen and DC Motor. DC Motor is used for starting Water Pump. When temperature is below 25, RGB LED should show green light; when temperature is between 25-40, RGB LED should show blue light and when temperature is above 40, RGB LED should show red light. The Water Pump should only start when temperature is above 25. Temperature values should show on the LCD Screen and also mention whether Water Pump is ON or OFF.
Automatic Car Parking Lot	Create a circuit using LCD Screen, ultrasonic sensor and servo. When car is detected by sensor, appropriate message should be shown on LCD Screen and servo should open the parking gate to allow the car to park.
Home Automation - II	Create a circuit using LDR, electric bulb, PIR sensor, temperature sensor and fan. Electric bulb should turn on depending on the darkness or brightness based on the LDR and fan should start when temperature sensor shows high temperature. The entire circuit should work only when someone is present in front of the PIR sensor otherwise all circuits should be turned off.
Water Level Controlling System	Create a circuit that controls the water pump. If water is below a certain level, the water pump starts automatically and when water rises above a certain level, the water stops automatically. Use the necessary components for creating the system.
Car Parking Lot	Create a circuit using LCD Screen, pushbuttons and servo. The parking lot can park only 10 cars. When entry button is pushed, servo should open the parking gate to allow the car to park reducing the parking space count. When exit button is pushed, servo should allow the car to exit the parking lot, thus increasing the parking space count. Appropriate messages should be shown on LCD Screen regarding the parking space count.
Traffic Light Controller System	Create a circuit using multiple colour LED's or RGB LED's. You need to simulate a formation of 4 signals similar to real life scenario at a cross roads. When one signal is green the others must be red. Each signal will be green for some duration, then orange and red.
Home Automation - III	Create a circuit using LCD Screen, IR remote, electric bulb and fan. The IR remote should control the bulb and fan. Switching on and off the electric bulb and fan should be controlled through the remote. Appropriate message should be displayed on the LCD Screen.

Particles Detector for Air Quality	Create a circuit using Gas Sensor, RGB NeoPixel Ring, piezo buzzer. The idea is to check the presence of gases in the atmosphere. When lesser particles is present, the NeoPixel Ring will indicate it with green colour. As the level of particle rises, the NeoPixel Ring will indicate it with orange/yellow colour. If the particles are above the danger level, the NeoPixel Ring will show it with red colour. [Hint: Take NeoPixel Ring with 12 LED's, use 4 LED's for green colour, 4 LED's for orange/yellow colour and 4 LED's for red colour]
Patient Temperature Monitoring System	Create a circuit using RGB LED, temperature sensor and ESP8266. The RGB LED will glow based on the temperature values. If the temperature value is too high, then RGB LED shows red else it shows green. The temperature values should be sent on Thingspeak channel through ESP8266.
Smart Dustbin	Create a circuit using 2 ultrasonic sensors, servo, piezo buzzer and ESP8266. The lid automatically opens when it detects people coming close to throw trash and closes after certain time. The second ultrasonic sensor detects the level of trash which is pre-defined. This value is sent on Thingspeak through ESP8266. If the bin is full, buzzer sounds an alarm.
Smart Hand Sanitizer	Create a circuit using ultrasonic sensor, PIR sensor, servo, piezo buzzer and ESP8266. The PIR Sensor detects person's hand coming close to sanitizer and opens the servo for sanitizer to eject and closes after certain time. The ultrasonic sensor detects the level of sanitizer which is pre-defined. This value is sent on Thingspeak through ESP8266. If the bottle is empty, buzzer sounds an alarm.
Smart Walking Stick for the Blind	Create a circuit using ultrasonic sensor, piezo buzzer and DC motor or vibration motor. The ultrasonic sensor detects any obstacle or object in front of the person. Depending on the distance, the alarm is started and the vibration motor vibrates the stick.

Show freely available slots on the LCD screen. When car is parked, indicate that the slot is occupied using RED LED and show the free slots on LCD screen. If all slots are full, show the appropriate message. Green LED indicates that the parking lot is empty and free.

**Mini projects ITSM:**

**ITSM Mini Project Allocation for Practical Exam**

Sr. No.	Div	Roll No.	Name	Topic Name	Topic Description
1	1	19302A3001	Vishakha Kulkarni	Guess Game	On press of a Button, then the mobile creates a random number between 1 and 100 that we have to guess. We guess the number in a TextBox and press the Button to check the number. The program should check and answer if the number is equal, greater or lesser than given in the text box.
2	1	19302A3002	Raj Mishra	Russian Roulette	On clicking "Reload button", one random number between 1-6 will be selected. User has to randomly press any 1 button out of the 6 buttons. If it matches the random number, the screen turns red else the button is disabled.
3	1	19302A3003	Mandar More	Minesweeper	On clicking "Start button", a minefield is created with 9 buttons. The total number of mines must be defined, User has to randomly press any 1 button out of the 9 buttons. If there is a mine then the screen turns red else the button is disabled. This will continue till all mines are found.
4	1	18302A0001	Vishak -	Tic Tac Toe	Create an app that allows you to play tic tac toe with the computer
5	1	18302A0002	Mehul Shah	Talking Tom	Create an app the listens to what you speak and then repeats the same.
6	1	18302A0004	Santosh Singh	Fidget Spinner	Create an app that works like a fidget spinner depending on the speed and friction as given by the user, it should rotate in any direction as the user wants
7	1	18302A0005	Vikrant Gurav	Make phone call by shaking the phone	Create an app that will ask for a favorite contact that you dial so frequently and keep it stored in the local mobile database. User is no longer need to search the number in contact list. He/she just required to open the app and just shake the phone, it will direct make call to your favorite contact.
8	1	18302A0006	Arun -	Theft Alarm App	Create an app which will play an alert sound when anyone touches or moves your phone from its position.
9	1	18302A0007	Sonali Jaiswal	Mini Golf App	Create an app that uses a ball and an ImageSprite to simulate a golf game. The ball needs to be flung towards the hole. If the ball hits the hole the app will say "Hit."
10	1	18302A0008	Alwin Maliakkal	Call a Friend App	Create an app uses the PhoneNumberPicker and a TinyDB to store a contact in a list and make a phone call to a contact from that list.
11	1	18302A0009	Rukhsar Khan	Camera App	The app uses the camera component to take a picture by clicking on the empty area of the picture frame. The picture is then displayed in a frame.
12	1	18302A0010	Himani Jain	Swat the Mosquito	This is an interactive game. The objective is to swat the mosquito with your finger. The mosquito flies randomly on the screen and the phone vibrates as the mosquito flies. When you swat the mosquito the game will say "Hit" and your score will increase by +1. You can reset the score to start a new game
13	1	18302A0012	Nishita Padhi	Dice	This app can be used as a replacement for a physical dice when playing board games such as Snakes and Ladders. Swing the phone to roll the dice. The app will speak out the number you have rolled.
14	1	18302A0014	Pranav Surade	Virtual Chemistry Experiments	This app uses the Canvas and ImageSprite components to demonstrate a virtual chemistry experiment. The user can drag and drop six different elements from the shelf into the beaker of water to see how they react

**ITSM Mini Project Allocation for Practical Exam**

Sr. No.	Div	Roll No.	Name	Topic Name	Topic Description
15	1	18302A0015	Nandini Maheshwaram	Canvas Paint Colour Picker	Create a canvas that allows the user to pick colours of a colour palette and then use it on the canvas. The user can draw dots as well as dashes or lines.
16	1	18302A0016	Uma Sharma	Timer App	Create a Timer App that allows you to start, stop and reset time. Also it should show how much time has elapsed between start and stop.
17	1	18302A0018	Sanket Patil	Clock	Prepare a clock app which had Alarm and timer in it
18	1	18302A0019	Siddhanth Palkar	Send data to ThingSpeak	Create an app that sends a random number to ThingSpeak on click of a button
19	1	18302A0021	Ankush Gidi	ListApp	Create an app that allows you to edit or delete items from the list
20	1	18302A0023	Vaibhav Kumar	ListMove	Create an app that allows you to move items up or down in the list
21	1	18302A0025	Vivek Maurya	ListSort	Create an app that allows you to sort the items in the list in either ascending or descending
22	1	18302A0026	Harsh Pandey	ScratchCard App	Create an app that allows you to view the underlying image upon scratching the screen
23	1	18302A0027	Aniket Vishwakarma	ImagePicker App	Create an app that allows the user to pick an image from gallery or click a picture and then share it

24	1	18302A0028	Sai Bokka	Rock Paper Scissor	Create an app that allows you to play a simple game of rock paper scissors with the computer. You need to select one from rock paper scissor and so will the computer. Count the number of wins for you and computer
25	1	18302A0029	Sagar Indulkar	Voice Calculator	Create an app that listens to basic arithmetic questions and gives the correct answer. The app should speak the correct answer as well as display it
26	1	18302A0030	Mithila Kambli	Age Calculator App	Create an app that takes the birth date from the user and calculates the age of the user
27	1	18302A0031	Amisha Yadav	Mole Mash Game	Create an app that allows the user to touch the mole. The mole should move at regular intervals. Compute the score (number of times the mole is touched correctly by the user)
28	1	18302A0032	Shradha Kasar	AI Search App	Create an online search app that allows you to search for videos online using voice commands on Youtube, Duckduckgo and Yahoo
29	1	18302A0034	Rahul Poojary	Covid Infection Probability App	Create an app that asks questions related to Covid infection and based on the answers, tell what is the probability that the user is infected
30	1	18302A0035	Shubham Ganjave	Covid Prevention Speech App	Create an app that mentions the symptoms, treatments and prevention for Covid. On click of respective button the app should speak the necessary information
31	1	18302A0036	Sahil Sharma	Digital Compass App	Create an app that shows a digital compass which senses the rotation of the phone and shows it accordingly
32	1	18302A0037	Prajnesh Puthran	My ToDo List	Create an app to which you can add and remove your tasks.
33	1	18302A0038	Suyash Mhatre	Don't get Faked App	Create a quiz app that can test a user's ability to detect if a story is fake or not.
34	1	18302A0039	Komal Gupta	Guess Game	On press of a Button, then the mobile creates a random number between 1 and 100 that we have to guess. We guess the number in a TextBox and press the Button to check the number. The program should check and answer if the number is equal, greater or lesser than given in the text box.

***ITSM Mini Project Allocation for Practical Exam***

Sr. No.	Div	Roll No.	Name	Topic Name	Topic Description
35	1	18302A0040	Abdul Salam Ansari	Russian Roulette	On clicking "Reload button", one random number between 1-6 will be selected. User has to randomly press any 1 button out of the 6 buttons. If it matches the random number, the screen turns red else the button is disabled.
36	1	18302A0041	Bhoomika Badala	Minesweeper	On clicking "Start button", a minefield is created with 9 buttons. The total number of mines must be defined, User has to randomly press any 1 button out of the 9 buttons. If there is a mine then the screen turns red else the button is disabled. This will continue till all mines are found.
37	1	18302A0042	Nachiket Virkud	Tic Tac Toe	Create an app that allows you to play tic tac toe with the computer
38	1	18302A0043	Monica Oza	Talking Tom	Create an app the listens to what you speak and then repeats the same.
39	1	18302A0044	Shubhankar Bag	Fidget Spinner	Create an app that works like a fidget spinner depending on the speed and friction as given by the user, it should rotate in any direction as the user wants
40	1	18302A0045	Sagar Dholam	Make phone call by shaking the phone	Create an app that will ask for a favorite contact that you dial so frequently and keep it stored in the local mobile database. User is no longer need to search the number in contact list. He/she just required to open the app and just shake the phone, it will direct make call to your favorite contact.
41	1	18302A0046	Harsh Chavan	Theft Alarm App	Create an app which will play an alert sound when anyone touches or moves your phone from its position.
42	1	18302A0047	Bhupendra Yadav	Mini Golf App	Create an app that uses a ball and an ImageSprite to simulate a golf game. The ball needs to be flung towards the hole. If the ball hits the hole the app will say "Hit."
43	1	18302A0048	Divesh Jalandriya	Call a Friend App	Create an app uses the PhoneNumberPicker and a TinyDB to store a contact in a list and make a phone call to a contact from that list.
44	1	18302A0049	Rushabh Gupta	Camera App	The app uses the camera component to take a picture by clicking on the empty area of the picture frame. The picture is then displayed in a frame.
45	1	18302A0051	Sairaj Kadam	Swat the Mosquito	This is an interactive game. The objective is to swat the mosquito with your finger. The mosquito flies randomly on the screen and the phone vibrates as the mosquito flies. When you swat the mosquito the game will say "Hit" and your score will increase by +1. You can reset the score to start a new game.
46	1	18302A0052	Aditya Bhoir	Dice	This app can be used as a replacement for a physical dice when playing board games such as Snakes and Ladders. Swing the phone to roll the dice. The app will speak out the number you have rolled.
47	1	18302A0053	Mohd Umar Shaikh	Virtual Chemistry Experiments	This app uses the Canvas and ImageSprite components to demonstrate a virtual chemistry experiment. The user can drag and drop six different elements from the shelf into the beaker of water to see how they react
48	1	18302A0054	Shreekant Kambli	Canvas Paint Colour Picker	Create a canvas that allows the user to pick colours of a colour pallette and then use it on the canvas. The user can draw dots as well as dashes or lines.
49	1	18302A0056	Md Faizan Mujawar	Timer App	Create a Timer App that allows you to start, stop and reset time. Also it should show how much time has elapsed between start and stop.

**ITSM Mini Project Allocation for Practical Exam**

Sr. No.	Div	Roll No.	Name	Topic Name	Topic Description
50	1	18302A0057	Sameer Chavan	Clock	Prepare a clock app which had Alarm and timer in it
51	1	18302A0058	Raj Gupta	Send data to ThingSpeak	Create an app that sends a random number to ThingSpeak on click of a button
52	1	18302A0059	Faisal Ansari	ListApp	Create an app that allows you to edit or delete items from the list
53	1	18302A0060	Anand Hande	ListMove	Create an app that allows you to move items up or down in the list
54	1	18302A0062	Rohit Mane	ListSort	Create an app that allows you to sort the items in the list in either ascending or descending
55	1	18302A0063	Wahid Shaikh	ScratchCard App	Create an app that allows you to view the underlying image upon scratching the screen

Take home task:

*Database Management Systems*

*Semester 3*

*Academic Year 2021-22*

Vidyalkankar School of Information Technology

SY BSc IT Semester III

Subject: *Database Management Systems*

Faculty Members: *Ms. Ashwini Koyande, Ms. Aasha Chavan, Ms. Rohini Desai*

**TAKE HOME TEST**

1. Write a short note on Conflict Serializability
2. What is Deadlock? Explain Deadlock prevention.
3. What do you mean by concurrent executions? Write the advantages for the same.
4. Explain log based recovery scheme.

Criteria II – Teaching-Learning and Evaluation

**Minute paper:**

Vidyalkar School of Information Technology

SYBScIT Semester III

Subject: *Database Management Systems*

Faculty Members: *Ms. Ashwini Kovande, Ms. Aasha Chavan, Ms. Rohini Desai*

One Minute Paper

Answer the questions in one line

1. Define Relational algebra.
2. List different operations used in Relational algebra.
3. Define Selection Operation
4. Define Projection Operation
5. List SET operations of Relational algebra.
6. List different types of keys used in DBMS.
7. Define Normalization.
8. Define Transaction
9. Define Deadlock

**Open book test:**

Vidyalankar School of Information Technology  
SY BSc IT Semester III

Subject: *Database Management Systems*

Faculty Members: *Ms. Ashwini Koyande, Ms. Aasha Chavan, Ms. Rohini Desai*

**Open Book Test**

**Q1. Create the following table and insert 5 five meaningful records in each table.**

CUSTOMER		
Attribute	Datatype	Constraint
<u>Custid</u>	Number(4)	Primary key
Lname	Varchar2(15)	
Fname	Varchar2(15)	
Area	Varchar2(10)	
Phone	Number(8)	

MOVIE		
Attribute	Datatype	Constraint
<u>Myno</u>	Number(2)	Primary key
Title	Varchar2(25)	
Type	Varchar2(10)	
Star	Varchar2(25)	
Price	Number(8,2)	

INVOICE		
Attribute	Datatype	Constraint
<u>Inyno</u>	Number(4)	Primary key
<u>Myno</u>	Number(2)	Foreign key movie( <u>myno</u> )
<u>Custid</u>	Number(4)	Foreign key customer( <u>custid</u> )
<u>Issuedate</u>	Date	

Perform the following queries on the above table:

- A) Find the names of customers whom have been issued movie type drama.
- B) Display the customer name along with title of the movie.
- C) Display the name of all the customers whose name starts with 'A'.
- D) Find out the title of the movies that have been issued to the customer whose fname is 'Mary'
- E) Add a column age to the customer table.

**Q2. Create the following table and insert 5 five meaningful records in each table**

Emp		
Attribute	Datatype	Constraint
<u>Empno</u>	Number	Primary key
Ename	Varchar2(15)	

<u>HireDate</u>	Date	
Deptno	Number	NOT NULL
Gender	Varchar2	
Salary	Number	
Commission	Number	

Perform the following queries on the above table

- A) Find the number of unique departments from emp table.
- B) Display department wise total salary from the emp table such that only those departments are displayed where the total salary is greater than 20,000.
- C) Calculate the total work experience of each employee.
- D) Display the number of employees from each department where the number of employees is equal to 2.
- E) List the name of all the employees whose salary is not between 10,000 and 20,000
