

VSIT prioritizes cleanliness on campus and encourages students and staff to follow effective waste management practices which include reduction at source; segregation and implementation of 3R's i.e. REDUCE, REUSE and RECYCLE before disposal. VSIT has a well-defined mechanism for waste disposal and sensitizes students and staff regularly in different ways as follows:

a) Solid Waste Management

Towards Solid Waste Management, VSIT has taken the following steps:

Prohibited the use of Styrofoam disposables in cafeteria and in creative crafts organized by students.

Initiated a drive to REDUCE plastic usage to the minimum essential, on and off the campus.

Solid waste is segregated at source. Organic waste is collected in green dustbins and non-biodegradable (Dry) waste in blue dustbins. The waste pickup and collection is done by housekeeping staff. The Municipality staff collects dry waste twice a day.

Installed a Composting Plant where all the cafeteria organic waste and gardening waste is converted to good quality manure which is used for in-house gardening and also distributed among staff and students to promote positive practices on waste management.

Displayed about the reduction of waste at source on digital boards regularly to sensitize students and staff.

Made provision for segregating dry waste as paper waste, plastic waste and metal waste which is given to vendors for recycling

Organized an awareness drive on campus for installing Brihanmumbai Municipal Corporation's "Swachhata App" to help keep our city clean.

| Date of the Activity | Name of the Activity | No. of Beneficiary |
|-----------------------------|-----------------------------|---------------------------|
| 6/2/2021 | Dry Waste Management | 16 |
| 1/2/2021 | Dry Waste Collection Drive | 33 |

Dry Waste Management

Total No. of volunteers: 16

Date: 06/02/2021

No. of drives :01

Description: The volunteers collected dry waste from home as well as college and disposed it to BMC vehicle.

NATIONAL SERVICE SCHEME

b) Liquid Waste Management

VSIT has set up its own STP (Sewage Treatment Plant) to take care of wastewater generated at campus.

Liquid waste includes wastewater generated by washrooms, regular cleaning and mopping and canteen wastewater.

The STP has a capacity to handle 200 m³ of sewage per day and consists of primary, secondary, and tertiary treatments.

The treated water is tested monthly for its discharge parameters to ensure compliance with standards and is pumped, stored, and REUSED in green landscaping through sprinklers

c) E -waste management

Institute takes efforts to minimize e-waste. Regular maintenance by technical staff and reutilization of spare parts of discarded electronic devices is a common practice.

To sensitize students and staff on careful disposal and management of electronic waste, E-waste bin is installed at VIT. E-waste is collected by a company called Eco Recycling Ltd (Ecoreco). Non-functional computers, monitors and printers are discarded on a systematic basis. 70% of monitors used at the Institute are LCD to REDUCE e-waste.
