Venue	TATA Hospital, Parel
No of Volunteers	134
No of Beneficiaries	5184 packets (81 Packets daily)

All volunteers were informed a day prior about the activity. Volunteers gathered at the Golden Jubilee gate near TATA Hospital. Volunteers started preparing 15 minutes prior to the food distribution which started from 11 am onwards. There were 3 crates that needed to be distributed amongst the patients and their family members.

Volunteers requested patients and their respective family members to adhere to social distance norms and wear their masks properly to avoid the spread of the Covid-19 virus. Volunteers assured that they were comfortable in the queue and had enough space between them. The food packets were distributed one by one to the patients and their families, volunteers made sure there was a dustbin where the packets were disposed of responsibly. Once all the food packets were distributed, the crates were handed to the members of the Annamrita Foundation and then the activity for the day was concluded.

This activity was held daily from 1st June 2021 to 30th July 2021 except on Sundays. The objective was to provide patients and their families with a daily need for nutritious food in tough times of the pandemic. Volunteers successfully distributed 5184 packets. The NSS Volunteers helped the Annamrita Foundation in the smooth distribution of food packets by following Covid-19 protocols given by the Central and state government. The event successfully ended at 1 pm.

Building on that **Arya** and **Rudraksh** explained the importance of engineers in today's world. Then they explained a variety of engineering fields including civil, computer, electronics, mechanical engineering.

Priyadarshini and **Rudraksh** then gave the importance of technology and careers to the participants with the help of some famous personalities who are at the top of their respective fields. They explained how with the rapid development of information and communication technology, educators and researchers increasingly highlight the potential merits of using educational technology to improve STEM learning outcomes.

Omkar Tawate, General Secretary IEEE-VSIT and **Chetna Bendale**, General Secretary WIE, IEEE-VSIT SB explained the importance of maths and careers. How maths helps in analytical thinking, how it develops one's ability to think, its importance in this constantly evolving world. Then by giving examples of Accountants and Data analysts they gave a few real-world applications of mathematics in careers.

Chetna then went on to explain the various benefits of Stem education. Some of them included were how it helps to build resilience, encourages experimentation, encourages teamwork, and instils creativity and innovation.

The team then made us familiar with women in stem. **Chetna** described **Radia Perlman** the inventor of the algorithm of tree protocol (STP). **Priyadarshini** made us familiar with work of **Rebecca Cole** who was a public health advocate, doctor, and health reformer in the United States and **Roberta Bondar** who was Canada's first female astronaut and the world's first astronaut-neurologist. **Arya** gave us an in-depth explanation of the career of **Irene Au** and how she created her own program of study in human-computer interaction. She built exceptional design teams for Google and Yahoo before joining Khosla Ventures as an Operating Partner.

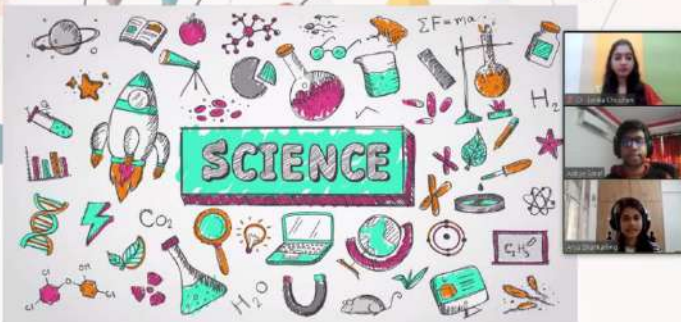

Dr. Sarika Chouhan then interacted with the students and solved their doubts regarding the careers they were aspiring to choose.

Dr. Sarika Chouhan then gave a vote of thanks and thanked everyone for the active participants and concluded the session.

Jayashree Foundation a Navi Mumbai-based NGO in association with the NSS unit of Vidyalankar School Of Information Technology organized a Radium Collar Drive for the street dogs in Nerul, Seawood's, Juinagar, Sanpada, and the near by locations. There were 7 NSS volunteers from VSIT and 18 NGO volunteers for the activity. The main purpose of the drive was to create awareness among the people and safeguard the lives of street dogs. All the volunteers reached the starting point which was “The Jewels of Navi Mumbai” at 8.am.

Firstly, Breakfast was provided and instructions were given to the volunteers as safety was first priority. Secondly, volunteers were divided into three different groups and each group was provided with Radium Collars belt and Pedigree to feed the dogs. Each group had an aim of 25 dogs. Proper care was taken for the dogs as well as the volunteers. After all the work was completed, the volunteers assembled back at the starting point. There they were provided with refreshments and snacks. The Founder of Jayashree Foundation Mr. Vaibhav Jadhav concluded all of us and appreciated our work.

Lastly, certificates were distributed among the volunteers. In the end, they learned about the protection of animals as they belong to the society . It was definitely a unique experience overall, till now they only worked for human welfare and this was a whole new experience for all of us. Volunteers got an opportunity to take part in a mass radium collar belt drive and got awareness about the importance of Radium Collar belts for stray dogs . At first, we all were curious to be part of this wonderful drive but at the end, we all got satisfaction for the same.

Beach Cleanup Drive at Mahim by Beach Please India

Date of activity	04-12-2021
Venue	Mithi River, Mahim Causeway
No of Volunteers	108
Waste collected	3 trucks of waste were collected.

The VSIT NSS Unit, in collaboration with Beach Please India, organized a beach clean-up drive at the Mahim Mithi River. All the volunteers were informed a day prior about the activity. On December 4, 2021, the event was held concurrently along the shore near Mithi River, with Beach Please and enthusiastic volunteers pitching in to clean the river areas. Before the clean-up, all participants were given safety equipment, such as masks and gloves, and were briefed on the clean-up procedures.

Approximately 108 volunteers and beach please crew members took part, and approximately 3 trucks of plastic, non-biodegradable waste, and other domestic waste were collected from the beach. "We're trying to educate the surrounding community, as well as the younger generation, about the importance of keeping the environment clean," said a Beach please crew member. They also mentioned that "recycling more reduces the amount of waste we send to landfills." When waste rots in a landfill, it leaches toxins into the groundwater and soil and emits greenhouse gases like methane as it decomposes, contributing to global warming and harming our environment.

They also stated that sanitary napkins, diapers, and other disposable items take more than 500 years to decompose. The collected waste was given to the Brihanmumbai Municipal Corporation staff (BMC). The Beach Please India crew concluded the drive by thanking all volunteers for their efforts in cleaning up the environment. Volunteers gained awareness about the importance of cleanliness and thus making our environment clean and this is going to make our future, pollution free.

Prevention of Land Erosion by Mangroves Clean-up at Airoli

Date of activity	05-12-2021
Venue	Mangroves Forest at Airoli
No of Volunteers	12

The NSS unit of VSIT in collaboration with Beach please India organized a mangrove clean-up drive on 28th November 2021 at Airoli Mangroves Forest. To clean the mangrove forest and conserve it. All volunteers were informed a day prior about the activity. It was organized to address the issue of garbage in the coastal area.

All participants were provided safety equipment, masks, gloves, and sacks and briefed about the clean-up guidelines before the clean-up. The founder of Beach please India Mr. Malhar Kalambe addressed the volunteers with the fact about the mangrove ecosystem and its role in controlling climate change. Mangroves trap more carbon dioxide than any other tree on this planet. Destruction of the mangrove ecosystem accelerates climate change & releases more carbon dioxide trapped by the mangrove. A total number of 23 Sacks of waste was collected. It was then segregated into categories like packaging material, plastic bottles, fabric, glass, metal, and so forth, as per the Beach Please guidelines.

The segregated waste was handed over to the staff of Navi Mumbai Municipal Corporation (NMMC). And the drive was concluded by Mr. Malhar Kalambe by thanking all the volunteers for taking a huge step forward in cleaning the environment. Volunteers got awareness about the importance of mangroves, giving a conclusion that cleaning and making our environment clean is going to make our future pollution free.

Protection against flooding by Mangroves Cleaning at Arioli

Date of activity	26-12-2022
Venue	Mangroves Forest at Arioli
No of Volunteers	34
No of Beneficiaries	200

The NSS unit in collaboration with Beach please India organized a mangrove clean-up drive on 26th November 2021 at Arioli Mangroves Forest. To clean the mangrove forest and conserve it. All volunteers were informed a day prior about the activity. It was organized to address the issue of garbage in the coastal area.

All participants were provided safety equipment- masks and gloves, sacks and briefed about the clean-up guidelines, prior to the clean-up. The founder of Beach please India Malhar Kalam addressed the volunteers with the fact about the mangrove ecosystem and its role in controlling climate change. They trap more carbon dioxide than any other tree on this planet. Destruction of the mangrove ecosystem accelerates climate change & releases more carbon dioxide. A total number of 23 sacks of waste was collected. It was then segregated into categories like packaging material, plastic bottles, fabric, glass, metal and so forth, as per the Beach Please guidelines.

The segregated waste was handed over to the staff of Navi Mumbai Municipal Corporation (NMMC). And the drive was concluded by Mr.Malhar Kalam by thanking all the volunteers for taking a huge step forward in cleaning the environment. Volunteers got awareness about the importance of mangroves, giving a conclusion that cleaning and making our environment clean is going to make our future pollution free.

MENSTRUAL HEALTH & HYGIENE MANAGEMENT

CSR Initiative of Unicharm India

CHILDREN ENTER PUBERTY ANYTIME IN THE EARLY ADOLESCENCE DEPENDING ON THEIR GENETIC, BIOLOGICAL & SOCIAL FACTORS

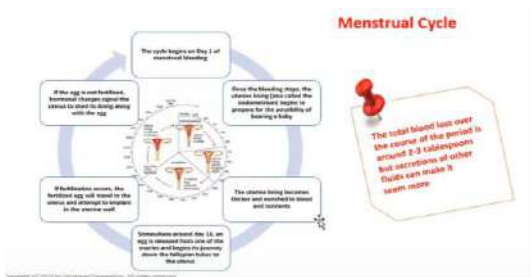

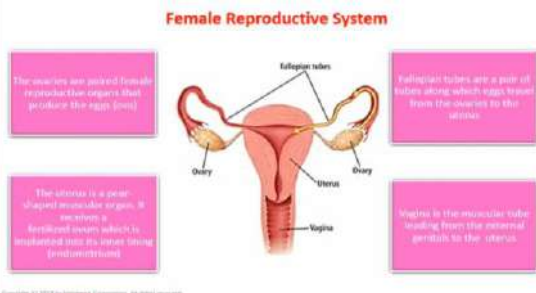

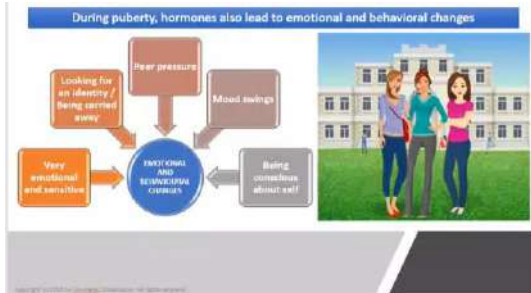

Early Adolescence - (10 to 13 Years of age)
Transition to adolescence characterized by puberty

Middle Adolescence - (14 to 16 years of age)
Essence of adolescence, strong peer group influence

Late Adolescence - (17-19 years of age)
Transition to adulthood and adult roles.

Puberty is the process of physical changes through which a child's body matures into an adult body capable of reproduction. It is initiated by hormonal signals from the brain to the gonads (ovaries in girls, testes in boys).

Adulthood is the period in the human lifespan in which full physical and intellectual maturity has been attained. Adulthood is commonly thought of as beginning between the age 18 to 21 years.

Menstrual Management

This will give you an idea about:

- Length of your menstrual cycle
- Number of days you bleed

Tracking your menstrual cycle will help you to stay prepared for the next menstruation.

The average menstrual cycle is 28 days long. It usually happens between 12-40 days.

A menstrual cycle is counted from the first day of one menstruation to the first day of the next menstruation.

Tracking is important to understand our cycle, as well as to have healthy periods. Missing periods or having prolonged periods are causes of:

- PCOS
- Thyroid disorders
- Uterine fibroids
- Diabetes
- Endometriosis
- PID (Pelvic Inflammatory Disease)

FOR THE CHILDREN... *It's a big kick!*

- Moving towards independence – taking ownership of your life choices and/or emotions.
- Not just right, responsibility...!
- Discussing and negotiating – not demanding...!
- Learning to accept "no" – no one is entitled to have it all their way...!
- Being very important...!
- Don't be in a hurry – learn to let your parents have "seniority" over longer...!

WHAT DO WE DO...?

- Empowerment of:
- Parents
- Communication
- Empathy
- Learning to let go – allowing more decision-making power with your child
- Sharing the process – make your child a partner in the process.

Date of activity	10 th March 2022 to 22-11-2022
Venue	Main Gate, College Campus
No of Volunteers	02 to 04 per day
No of Beneficiaries	104

The NSS unit of VSIT did a volunteering activity at Cafe Coffee Day from 10th March 2022 to 22nd April 2022 in two to three batches per day from 9 am to 5 pm. All volunteers were informed a day prior about the activity timings & dress code. All volunteers used to meet at our college campus and prepare for the volunteering activity. The volunteers encouraged and convinced all the students to follow social distancing and wear their masks.

Volunteers spoke politely and requested all the students to wear their masks and college ID cards on the college campus. Volunteers also asked students to maintain cleanliness around the area. All were pleased by the volunteers' social awareness and devotion, as well as their ability to stand for lengthy periods of time and maintain a social distance within the College's CCD area. In this unsettling period of the pandemic, volunteers instructed students on the importance of maintaining social distancing and wearing masks. The Volunteering Activity at CCD went off without a glitch.

All participants were provided safety equipment, masks, gloves, and sacks and briefed about the clean-up guidelines before the clean-up. The founder of Beach please India Mr. Malhar Kalambe addressed the volunteers with the fact about the mangrove ecosystem and its role in controlling climate change. Mangroves trap more carbon dioxide than any other tree on this planet. Destruction of the mangrove ecosystem accelerates climate change & releases more carbon dioxide trapped by the mangrove. A total number of 23 Sacks of waste was collected. It was then segregated into categories like packaging material, plastic bottles, fabric, glass, metal, and so forth, as per the Beach Please guidelines.

The segregated waste was handed over to the staff of Navi Mumbai Municipal Corporation (NMMC). And the drive was concluded by Mr. Malhar Kalambe by thanking all the volunteers for taking a huge step forward in cleaning the environment. Volunteers got awareness about the importance of mangroves, giving a conclusion that cleaning and making our environment clean is going to make our future pollution free.

Online Disaster Management

Date of activity	5/4/2022
Venue	Zoom and You Tube
No of Volunteers	12
No of Beneficiaries	130

The activity was conducted on Disaster Management . The session started at sharp 9.15 am. All the volunteers gathered together on Zoom and YouTube Live before 09:00 am, 15 minutes prior to the session. The Speaker guided all the volunteers about how we deal with the human, material, economic or environmental impacts of said disaster. They gave information such as the conservation of lives and property during a natural or man-made disaster.

Disaster management plans are multi-layered and are planned to address issues such as floods, hurricanes, fires, mass failure of utilities, and the rapid spread of disease. India is especially vulnerable to natural disasters because of its unique geo-climatic conditions, having recurrent floods, droughts, cyclones, earthquakes and landslides. Due to the vastness of the country different regions are vulnerable to different natural disasters. Volunteers were also made aware of the key to reducing loss of life, personal injuries, and damage from natural disasters is widespread public awareness and education. People must be made aware of what natural hazards they are likely to face in their own communities.

Volunteers were given details about Disaster management is how we deal with the human, material, economic or environmental impacts of a said disaster, it is the process of how we “prepare for, respond to, and learn from the effects of major failures”. Though often caused by nature, disasters can have human origins. A question and Answer session was also done where volunteers asked their doubts and were keen to get more knowledge about the topic. The volunteers also came up with questions on the session topic and it was answered by (speaker) accordingly. In the end, the speaker was thanked with a vote of thanks by a volunteer and ended the session. The session ended at 10:30 am.
